

Rainbow Trout Creativity

The Harbour School

The first school in Phuket to embrace the Finnish Educational System

Investing in your child's future

**What makes the
Finnish educational system
the best in the western world?**

**Here is what is VERY UNIQUE
about our curriculum**

We are truly child centered

We have No homework!! No meaningless worksheets !!

Children get to play outdoor every hour

Play Play and Play under the guidance of the most updated research in the world on how children's brain work.

We help connect children to nature.

Mixed age group classrooms allow children to form a real life community and learn from each others.

We let children be children. We allow them to fuel their imagination in a way that builds strong bases of curiosity, creativity and independence.

Learn to build self confidence by engaging in risky play with close adult supervision

growing vegetables and fruits

building dam

Here children learn 'Life Skills' by cleaning up after themselves. They help clean their own school and take turns serving lunch to their fellow students.

Everyday children will help each other clean their own classroom

Children will take turn to serve each other's lunch

Situated right in front of a beautiful harbour in one of the safest communities in Phuket with over 200 security cameras allows us to offer this unique curriculum.

Our outdoor classroom is quite literally a sailing platform to allow the kids to learn math, science, biology of marine life, social studies, art, music and other relevant topics

We are always finding ways to offer new experiences for the children to interact and engage with our lessons.

Facility

CLASSROOM

Calm, magical and aesthetically pleasing

Food Experiment Area

Used for cooking, cooking workshops and other food experiments

Lighting Experiment Room

Where children can learn about light, shadow and reflection
